

Workgroup: Adolescent Health

Highest scoring objectives are highlighted.

Priority 5: Communities and providers support physical, social and emotional health (Domain: Adolescent Health)

Objective	Urgency (U) 2-5	Impact (I) 1-3	Realisti c (R) 1-3	Total U+I+ R	Comments <i>Key insights your team has had working in this area to date, known partners, interventions, programs, etc.</i>
5.1: Increase the number of schools that are implementing programs that decrease risk factors associated with bullying by 2020. – title bothers. “decreasing risk factors” is difficult because some are not modifiable.	3	2	2	7	If high impact, there has to be some information that supports does this intervention impact the bullying? Broad, hard to define problem. Suicide rate is increasing.
5.2: Increase the number of adolescents aged 12 through 17 years accessing positive youth development, prevention, and intervention services and programs by 2020. 5.2.5. “...benefits of abstinence and/or safe-sex practices...”	5	3	2	10	Measuring will be hard, but we can.
5.3: Increase the number of providers serving adolescents that assess for and intervene with adolescents at risk for suicide.	5	3* (if “intervene” happens)	1	9	If providers know how to screen, this is good. If don’t do it well, will mess it up. Concerned about mentioning screening without providing follow-up services. Screening itself doesn’t do any good. If all tied to suicide prevention, then needs to be immediately available. If treatment piece happens, and happens well, then this would be very good. Not enough providers, no funding. Great goals, but don’t think it will happen.

Objective	Urgency (U) 2-5	Impact (I) 1-3	Realisti c (R) 1-3	Total U+I+ R	Comments <i>Key insights your team has had working in this area to date, known partners, interventions, programs, etc.</i>
<p>5.4: Develop a cross-system partnership and protocols to increase adolescents' receipt of annual preventive services by 2020.</p> <p><i>If we really want them to go, need a school-based requirement.</i></p>	4	3	3	10	Needs to be more than "engage", as in encourage. Needs to be some type of requirement coming from KSDE
<p>5.5: Increase the number of adolescents receiving immunizations according to the recommended schedule (ACIP) by 2020.</p>	5	3+	3	11	Bad with meningitis and HPV. Do well with TDAP. Adolescent Immunization Project Wellness grant at KAAP. Merck-funded grant to national AAP to chapters. Also, cancer center effort around increasing HPV vaccinations. Should also be more focused on nurses. All providers need to be on-task and on-message with this.

National Performance Measure (NPM)	Data Trend
NPM 09: Bullying (Percent of adolescents, 12 through 17, who are bullied or who bully others)	Both are down
NPM 10: Adolescent well-visit (Percent of adolescents, ages 12 through 17, with a preventive medical visit in the past year)	Negative trend

Priority 2: Services and supports promote healthy family (Domain: Cross-Cutting/Life Course)

Objective	Urgency (U) 2-5	Impact (I) 1-3	Realistic (R) 1-3	Total U+I+R	Comments <i>Key insights your team has had working in this area to date, known partners, interventions, programs, etc.</i>
2.1: Increase opportunities to empower families and build strong MCH advocates by 2020.	3	2	2	7	

State Performance Measure (SPM)	Data Trend
SPM 2: Percent of children living with parents who have emotional help with parenthood	Unchanged Seems high – what is the data source? How is it defined?

Priority 6: Professionals have the knowledge and skills to address the needs of maternal and child health populations. (Domain: Cross-Cutting/Life Course)

Objective	Urgency (U) 2-5	Impact (I) 1-3	Realistic (R) 1-3	Total U+I+R	Comments <i>Key insights your team has had working in this area to date, known partners, interventions, programs, etc.</i>
6.4: Build MCH capacity and support the development of a trained, qualified workforce by providing professional development events at least four times each year through 2020. <i>*also reviewed by Child, Perinatal/Infant and Adolescent Health Workgroups</i>	4	2	3	9	Impact depends on how engaged people are.
6.5: Deliver annual training and education to ensure that providers have the ability to promote diversity, inclusion, and integrate supports in the provision of services for the Special Health Care Needs (SHCN) population into adulthood. <i>*also reviewed by Child Health Workgroups</i>	4	3	2	9	Almost more important to identify and train adult providers; this is more of a barrier than pediatric providers

National Performance Measure (NPM)	Data Trend
NPM 14 (A): Smoking during Pregnancy and Household Smoking (A.) Percent of women who smoke during pregnancy.	Think it varies by community
NPM 14 (B): Smoking during Pregnancy and Household Smoking (B.) Percent of children who live in households where someone smokes.	Think it varies by community

Priority 7: Services are comprehensive and coordinated across systems and providers (Domain: CYSHCN)

Objective	Urgency (U) 2-5	Impact (I) 1-3	Realistic (R) 1-3	Total U+I+R	Comments <i>Key insights your team has had working in this area to date, known partners, interventions, programs, etc.</i>
7.1: Increase family satisfaction with the communication among their child's doctors and other health providers to 75% by 2020. <i>*also reviewed by Child Health Workgroups</i>	5	3	2	10	
7.2: By 2020, increase the proportion of families who received care coordination supports through cross-system collaboration by 25%.	4	3	2	9	

National Performance Measure (NPM)	Data Trend
NPM 11: Medical home (Percent of children with and without special health care needs having a medical home)	mixed

Priority 8: Information is available to support informed health decisions and choices. (Domain: Cross-cutting/Life Course)

Objective	Urgency (U) 2-5	Impact (I) 1-3	Realistic (R) 1-3	Total U+I+R	Comments <i>Key insights your team has had working in this area to date, known partners, interventions, programs, etc.</i>
8.4: Increase youth-focused and youth-driven initiatives to support successful transition, self-determination, and advocacy by 2020.	4	2	3 Easy enough to partner with schools, etc.	9	
8.5: Incorporate information regarding changes to the health care system into existing trainings and technical assistance by 2020. <i>*also reviewed by Child, Perinatal/Infant and Adolescent Health Workgroups</i>	5	3	2	10	Really important, technically not difficult, but conceptually hard because it involves changing mindsets.

State Performance Measure (SPM)	Data Trend
SPM 5: Percent of adults who report that it is somewhat difficult or very difficult to understand information that doctors, nurses and other health professionals tell them	No data
