

# Improving Outcomes for Substance-Exposed Infants and Families: *A Kansas Plan for Prevention and Intervention*

August 28, 2017 • 10:00 a.m. to 3:30 p.m.  
Location: Kansas Health Institute, 212 SW 8th Avenue, Topeka

---

## TODAY'S SPEAKERS

**Dr. Jeff Colyer, Lieutenant Governor of Kansas**  
**Dr. Susan Mosier, Secretary and State Health Officer, Kansas Department of Health & Environment**  
Kansas Department for Children & Families  
Kansas Department for Aging & Disability Services

**Mark Hudak, MD – University of Florida College of Medicine – Jacksonville**  
*Chief, Division of Neonatology and Professor and Chairman of Pediatrics*  
Dr. Hudak's work focuses on neonatology including patient and family care; education of new generations of physicians; medical direction of level III/IV NICUs; medical direction of our ECMO program; divisional, departmental, and practice plan administration; and basic physiological research. His greatest passion is working to advance the field through engagement in meaningful clinical trials that are well-designed to answer significant questions. Dr. Hudak has served in a number of leadership roles within professional societies as well as serving the public through state and federal appointments. Notably, he currently serves as chair of the FDA's Pediatric Advisory Committee and as a member on their Neonatology Advisory Subcommittee and is also currently chairing the AAP Committee on Child Health Financing.

**Dr. Jodi Jackson, MD – Shawnee Mission Medical Center/Children's Mercy Hospital**  
*Neonatologist, NICU Medical Director, and Chair of the Kansas Perinatal Quality Collaborative*

**Madge Buus-Frank – Vermont Oxford Network**  
*Executive Vice President, Director of Quality Improvement and Education*  
Vermont Oxford Network (VON) is a nonprofit voluntary collaboration of health care professionals working together as an interdisciplinary community to change the landscape of neonatal care. This community of practice includes nearly 1185 centers around the globe that voluntarily submit data about the care and outcomes of high-risk newborn infants. Vermont Oxford Network serves as a neutral, independent party in analyzing data for our member centers and facilitating voluntary benchmarking activities. The Databases are used to provide comprehensive, confidential reports that serve NICU teams dedicated to improving the quality, safety and value of care for at-risk neonates and their families.

**Bonnie DiPietro – Maryland Patient Safety Center**  
*Director*

Facilitation provided by the Wichita State University Community Engagement Institute
