### Key and Definitions

An "-" indicates the data were not available at the time of reporting.

The **arrow** indicates direction of the trend, if any, and the color indicates if the direction is positive (**green**), negative (**red**), or no definite trend apparent (**yellow**).

**HP2020**: Healthy People 2020 goal

**PRAMS**: Pregnancy Risk Assessment Monitoring System; Kansas PRAMS was funded in 2016 and is a collaborative project with the Centers for Disease Control and Prevention (CDC). Kansas will obtain data to understand the risk factors that contribute to poor pregnancy outcomes and understand the experiences and behaviors before, during, and after pregnancy that result in high risk births. Data collection will begin in 2017 and involve approximately 2,500 mothers providing information.

**Medicaid and Non-Medicaid**: Based on the "principal source of payment for this delivery" as reported on the birth certificate.

**Medicaid Measure**: Based on if it is a quality care measure necessary for the national level or for Managed Care Organizations to report to state of Kansas

**CMS**: Centers for Medicare and Medicaid Services

**P4P**: Pay for Performance Measure for Managed Care Organizations to report to state of Kansas

**Bolded NPMs**: Selected National Performance Measures that are most closely aligned with Kansas priorities.

\*Statistically significant trend ( $p < 0.05$ ); †2015 Q1-Q3

### Notes:

1. The *MCH Biennial Summary, 2014* is available and posted on the Bureau of Family Health (BFH) website (<http://www.kdheks.gov/c-f/mch.htm>). This document was developed and designed to describe and track progress on the public health significance of the indicators related to women/maternal health, perinatal/infant health, child health, adolescent health, children and youth with special health care needs, and cross-cutting/life course. The biennial summary also provides trend data and determines how well the priorities have been addressed by state and local programs.
2. The *Preconception Health Report* is available and posted on the BFH website ([http://www.kdheks.gov/bfh/download/Preconception\\_Health\\_Report.pdf](http://www.kdheks.gov/bfh/download/Preconception_Health_Report.pdf)). This report reflects KDHE Bureau of Family Title V programming efforts to view issues from a life course perspective. This report is intended to be a visualization tool to highlight key disparities in 13 preconception health indicators representing the following domains: 1) general health status and life satisfaction, 2) social determinants of health, 3) health care, 4) tobacco, alcohol and substance use, 5) nutrition and physical activity, 6) mental health, and 7) chronic disease.
3. The *Life Course Indicators Report* is available and posted on the BFH website ([http://www.kdheks.gov/bfh/download/Life\\_Course\\_Indicators\\_Report.pdf](http://www.kdheks.gov/bfh/download/Life_Course_Indicators_Report.pdf)). This report is intended to be a visualization tool to help highlight key disparities in 11 life course indicators representing the following domains: 1) childhood experiences, 2) family well-being, 3) health care access and quality, and 4) mental health.
