

Priority & Measure	<u>Key Barriers/Challenges/Factors Identified in Group Discussion</u>
<p>#6: Services are comprehensive and coordinated across systems and providers</p> <p><i>(NPM: Medical Home)</i></p>	
<p>#1: Women have access to and receive coordinated, comprehensive services before, during, and after pregnancy.</p> <p><i>(NPM: Well Woman Visit)</i></p>	
<p>#3: Families are empowered to make educated choices about infant health and well-being.</p> <p><i>(NPM: Breastfeeding)</i></p>	
<p>#2: Developmentally appropriate care and services are provided across life span.</p> <p><i>(NPM: Developmental screening)</i></p>	
<p>#4: Communities and providers support physical, social and emotional health</p> <p><i>(NPM: Adolescent well visit)</i></p>	
<p>#7: Information is available to support informed health decisions and choices</p> <p><i>(SPM: Health literacy)</i></p>	

Based on these scenarios and case studies, please share your summary reflections:

1. As you considered these scenarios and case studies, what factors (if any) surprised you? What new barriers or challenges (if any) did you identify that you had not thought about before?
  
  
  
  
  
  
  
  
  
  
2. Considering the scenarios, case studies and discussion from today,
  - a. What is one thing that you would like to do differently going forward?
  
  
  
  
  
  
  
  
  
  
  - b. What is one thing that your organization, or an organization you're involved with, could do differently going forward?
  
  
  
  
  
  
  
  
  
  
  - c. What is one thing the Title V program could do differently going forward?

Group (please circle one):

*Women/Maternal*

*Perinatal/Infant*

*Child*

*Adolescent*

Name: \_\_\_\_\_

*Please turn in to Connie Satzler at the end so we can compile and share with the program. Or, if you want to keep your copy, text a picture of this to Connie at 785-410-0410.*
