

## Complications with Post Partum visits at Title X Clinics

- Currently Title X clinics are bound to their local legal authority when assessing liability. –**This can vary from county to county**
- **Policy for post-partum moms is that a clinic will not see patients unless they have had a 6 week check up with the OB-GYN OR wait 10 weeks to be seen**
- **This is a huge missed opportunity to help a mom get on a LARC or other birth control during this period as well as missed post partum assessment periods.**

# Title X Post Partum Visit Liability

- Missed opportunities
- Increased healthcare costs because they get the service at the hospital or OB-GYN
- Have to assume they DID indeed see doctor, or make the client wait
- What can we do to help local legal change these policies?

## Thank you/Questions
